Languages: NodeJS, ExpressJS, Socket.io

Databases: SQL and NoSQL (MongoDB, PostgreSQL)

SunzTech

June 2022 - Feb 2023

Web Developer Intern

Integrated React front-end with WordPress back-end, converting static webpages to dynamic React.js components.

Learned best coding practices from senior developers.

Certificate:

<https://lablab.ai/u/@fatimaarshad10/clxuet54m001z10o5c2rxh7fe>

<https://lablab.ai/u/@fatimaarshad10/cm0fgqwff0041e7lh5agnic7f>

Certificate of Completion Stanford University's Code in Place

Projects

Company project: (Handled backend development)

- Let's play app
- Rafed or selmek project.
- Profiler

Deep Turing AI - Client Project

- Resolved deployment, frontend, and backend errors, ensuring responsiveness and validation.
- Assisted an international client to enhance platform efficiency and reduce development time. (<https://deepturingai.com/>)

Peace Yard - Client Project

- This is a MERN stack project where I handled both backend API development and frontend design, along with API integration on the dashboard.

You can access the Peace Yard dashboard using the following link: (<http://peaceyard.s3-website.eu-north-1.amazonaws.com/>)

Emma Mental Health - International Hackathon

Participation

- Designed intuitive UI/UX for a mobile app in a 72-hour challenge.
- Collaborated with experienced team members on project ideation.
- Earned a gold medal.
- <https://lablab.ai/event/hello-gpt-4o-ai-challenge/mental-health-gpt4o/emma-mental-health>

Health Genius - Final Year Project

- Developed a comprehensive medical services platform, handling both frontend and backend.
- Key features: secure authentication, appointment scheduling, booking, online payments,
- real-time chat, lab report access, patient history, and feedback system. (<https://health-genius.vercel.app/>)
